

Vocabulary: Week of March 2

Instructions: Complete the crossword puzzle. Use the clues to help identify the words.

Across

1. Angles in the same relative position in polygons with an equal number of sides.
6. The number that indicates how many times the base is used as a factor.
8. A measure of the steepness of a line on a graph, given by the rise divided by the run.
9. Then points where the graph of a line touches the x and y axes.
10. Two angles whose measures add to 90 degrees.

Down

2. The distance of a number from zero on a number line.
3. A transformation that enlarges or reduces a figure.
4. A transformation that flips a figure across a line.
5. A transformation that turns a figure around a point.
7. A transformation that slides a figure along a line. All points of the image are the same distance from the preimage.
