Holt McDougal Mathematics Course 3

## Vocabulary: Week of March 9

**Instructions:** Complete the crossword puzzle. Use the clues to help identify the words.

### Across

- Angles in the same relative position in polygons with an equal number of sides.
- Matching sides of two or more polygons.
- Figures with the same size and shape.
- A change in the size, position, or orientation of a figure.
- A set of two or more equations that contain two or more variables.

### Down

- A ratio that compares the amount of change in a dependent variable to the amount of change in an independent variable.
- A measure of the steepness of a line on a graph, given by the rise divided by the run.
- A movement of a figure along a straight line.
- Two numbers that are an equal distance from zero on a number line.
- A transformation that turns a figure around a point.
